EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ashley I. Pezzner on September 15, 2006.

The application has been amended as follows: on page 3 at line 14 insert the heading Brief Description of Drawings. On the line directly under this heading insert:

Figure 1 depicts an embodiment of the invention.

Figure 2 depicts an embodiment of the invention.

Figure 3 depicts an embodiment of the invention.

Figure 4 depicts an embodiment of the invention.

2. The following is an examiner's statement of reasons for allowance: Regarded by the Examiner as the closest prior art, US Patent No. 4,638,084 teaches dimerizing a lower alkyl acrylate or a lower alkyl methacrylate to the corresponding dialkyl hexenedioates and dialkyl 2,5-dimethylhexenedioates and that dialkyl hexenedioates are readily convertible to adipic acid (hexandioic acid) by hydrogenation and subsequent hydrolysis (see column 1, lines 25-52). US Patent No. 4,638,084 fails to teach or fairly suggest step a). It is the Examiner's opinion that one having ordinary skill in the art would at the time the invention was made would have obtained the dicarboxylic diester of formula (II) by dimerization, as taught by the prior art, and would not have found it obvious to obtain the dicarboxylic diester by step a) of the instant invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
